

**Safe
Prescribing
Initiative**

HANLEY FOUNDATION

Spot the Changes. Save a Life.

Children and adolescents spend an **average of 7 hours at school, 180 days a year**. Therefore, **teachers and other school personnel** are vital in **noticing fundamental changes** in most children and adolescents' **behaviors**.

FOUR critical behavioral changes that may **indicate prescription opioid misuse or abuse** in adolescents and children are:

01

**A Dramatic Change
in Peer Groups**

02

**Increased Carelessness
with Grooming**

03

**A Severe Decline in
Academic Performance**

04

**A Sudden Loss of Interest
in Favorite Activities**
